CERTIFICATE

This is to certify that the Lab work entitled “**COMPILER DESIGN**” carried out by **CHINMAYI (1BM21CS045)**, who is bonafide student of **B.M.S. College of Engineering**. It is in partial fulfillment for the award of **Bachelor of Engineering in Computer Science and Engineering** of the Visvesvaraya Technological University, Belgaum during the academic semester November-2023 to March-2024. The Lab report has been approved as it satisfies the academic requirements in respect of a **COMPILER DESIGN (22CS5PCCPD)** work prescribed for the said degree.

DECLARATION

I, CHINMAYI(1BM21CS045), student of 5th Semester, B.E, Department of Computer Science and Engineering, B. M. S. College of Engineering, Bangalore, here by declare that, this lab report entitled " **Compiler Design**" has been carried out by me under the guidance of Prof. Sunayana S, Assistant Professor, Department of CSE, B. M. S. College of Engineering, Bangalore during the academic semester November-2023-February-2024.

I also declare that to the best of my knowledge and belief, the development reported here is not from part of any other report by any other students.

Lab Program No.	Program Details	Page No.
	Part-A: Implementation of Lexical Analyzer, By using C/C++/Java/Python language and using LEX tool.	
1	Write a program to design Lexical Analyzer in C/C++/Java/Python Language (to recognize any five keywords, identifiers, numbers, operators and punctuations)	6-11
2	Write a program in LEX to recognize Floating Point Numbers.	11-12
3	Write a program in LEX to recognize different tokens: Keywords, Identifiers, Constants, Operators and Punctuation symbols.	12-13
4	Write a LEX program that copies a file, replacing each nonempty sequence of white spaces by a single blank.	14-25
5	Write a LEX program to recognize the following tokens over the alphabets {0,1,...,9} a) The set of all string ending in 00. b) The set of all strings with three consecutive 222's. c) The set of all string such that every block of five consecutive symbols contains at least two 5's. d) The set of all strings beginning with a 1 which, interpreted as the binary representation of an integer, is congruent to zero modulo 5. e) The set of all strings such that the 10th symbol from the right end is 1. f) The set of all four digits numbers whose sum is 9 g) The set of all four digital numbers, whose individual digits are in ascending order from left to right.	15-19
	Part-B: Part-B: Implementation of Parsers (Syntax Analyzers) Using C/C++/Java/Python language)	
1	Write a program to implement (a) Recursive Descent Parsing with back tracking (Brute Force Method). $S \rightarrow cAd$, $A \rightarrow ab/a$	19-23
	Part-C: Syntax Directed Translation using YACC tool	
1	Design a suitable grammar for evaluation of arithmetic expression having + and – operators. + has least priority and it is left associative - has higher priority and is right associative	23-25

2	Use YACC to implement, evaluator for arithmetic expressions (Desktop calculator) .	25-28
3	Use YACC to generate Syntax tree for a given expression.	29-32
4	Use YACC to convert: Infix expression to Postfix expression.	32-34
5	Use YACC to generate 3-Address code for a given expression	34-37

Course Outcome

CO1	Apply the fundamental concepts for the various phases of compiler design.
CO2	Analyze the syntax and semantic concepts of a compiler.
CO3	Design various types of parsers and Address code generation
CO4	Implement compiler principles, methodologies using lex, yacc tools

Part-A: Implementation of Lexical Analyzer, By using C/C++/Java/Python language and using LEX tool.
